

# MASON KELLERMAN *(he/him)*

✉ masonkellerman1@gmail.com     linkedin.com/in/masonkellerman1     github.com/masonkellerman

## Education

<b>University of California, Los Angeles</b>	Sep. 2022 – Jun. 2026 <i>(Anticipated)</i>
<i>Bachelor of Science in <b>Statistics &amp; Data Science</b></i>	<i>Los Angeles, CA</i>
<i>Bachelor of Arts in Psychology</i>	<b>3.993 GPA</b>
<i>Minor in Education Studies</i>	

## Skills and Coursework

- |  |   |  |   |
|--|---|--|---|
| • R and RStudio (ggplot2, tidyverse, mlr3) | • Psychometric Measure Development/Assessment | • Predictive Regression Modeling Methods | • Familiarity with Bayesian Statistical Methods       |
| • Multivariate Statistical Analysis        | • Quasi-Experimental Methods                  | • Educational Program Evaluation         | • Familiarity with <i>LaTeX</i> , Quarto, Python, SQL |

## Experience

<b>mHTI Project Data Prep Team</b>	Oct. 2024 – Mar. 2025
<i>Fellowship (Short-Term)</i>	<i>Los Angeles, CA</i>
<ul style="list-style-type: none"><li>Processed and cleaned qualitative data from multi-participant conference audio and video recordings to construct transcripts with detailed speaker identity information to enable more detailed further research analysis.</li><li>Utilized advanced transcription software and cloud-based file sharing platforms to efficiently manage, organize, and analyze large volumes of sensitive qualitative data while maintaining data-privacy standards.</li><li>Addressed technical challenges in audio quality and speaker overlap, developing solutions to improve transcript accuracy and completeness for downstream research applications.</li><li>Maintained detailed documentation and records to ensure coordination of goals and workload among asynchronous teammates in remote work environment.</li></ul>	

<b>Team Lead</b>	May 2024 – Present
<i>Cathy's Cookies</i>	<i>Orange, CA</i>
<ul style="list-style-type: none"><li>Train and onboard new employees while leading shift teams, delegating tasks and coordinating workflow processes to maintain productivity and enable high-volume service during peak operational periods.</li><li>Coordinate between management and team leads to develop and implement data-driven operational strategies to improve specific employee satisfaction and customer satisfaction performance metrics.</li><li>Operate and maintain commercial vehicle and warehouse facilities to ensure product availability and quality in service of enhanced service delivery across teams.</li></ul>	

## Projects

<b>Sabermetric Comparison Report   R, LaTeX</b>	<i>(In Progress)</i>
<ul style="list-style-type: none"><li>Developed classification models to predict game outcomes based on varying levels of advanced sports sabermetrics in order to compare predictive ability for WNBA team game data from 2021–2025.</li><li>Report on tradeoff between simplicity and predictive ability of more and less advanced basketball statistics, substantiating theoretical explanation with cross-validation and test data.</li><li>Constructed new advanced metrics suite with goal of predicting future games, considering single and composite metrics.</li><li>Designed presentation to communicate results, with emphasis on creating understanding for a lay audience.</li></ul>	
<b>Situation-Dependent ABS Challenge Tool   R, Python, Quarto</b>	<i>(In Progress)</i>
<ul style="list-style-type: none"><li>Created system of analytical models that assess how valuable a potential ABS challenge would be in a given MLB game in terms of run value and WPA via probability matrices, depending on specific contextual game-state factors.</li><li>Introduced additional contextual factors, like select player and team tendencies, to optionally include in order to refine suggested decision and increase external validity of models.</li><li>Build dashboard using Python to view updated optimal decision based on a given game situation and additional preference parameters, emphasizing speed and ease of usability for implementation in real-world environment.</li></ul>
